**CACAO**  
KAKAO - COCOA

**NEW**

# Royal Deep Dark 10/12%

- BACKGROUND** There is a remarkable trend toward darker, more intensely flavored cocoa powder. This shift is driven by consumer demand for more indulgent options and the association of dark chocolate with certain health benefits. EKA Cocoa Powders has developed a new variety: **EKA Royal Deep Dark**.
- ACHIEVEMENT** Create a low-fat cocoa powder (10-12% fat content) with a rich, deep dark color intended to enhance the flavor experience.
- FLAVOR PROFILE** **Strong and bitter cocoa notes to provide an intense chocolate flavor.**
- COLOR** A rich, brown color in its raw form. When applied, it delivers a deeper, more intense dark brown coloration, enhancing the visual appeal in various culinary applications.
- pH VALUE** **7.0 – 8.0**
- ORIGIN** Made from a selection of premium origin cocoa beans from Ivory Coast, Ghana and Cameroon.
- FAT CONTENT** **10-12%**
- APPLICATION** Royal Deep Dark imparts a rich, deep color to ice cream, bakery items, and chocolate recipes. For ice cream, add approximately 90 g per liter of ice cream mix. Allow the frozen chocolate ice cream to rest overnight for an even more intensified deep dark color. Patience is key to achieving the best results.

## BENEFITS

- **Low Fat Content (10/12%)**  
Less fat, healthier, and a more intense cocoa flavor.
- **Low Costs**  
A cocoa powder with an attractive price despite the current high cocoa prices.
- **Deep Dark Color**  
Provides an unmatched visual contrast in your products.
